

Missy

Missy

Missy is a 5 year old harlequin female. This pretty girl has naturally upright ears and double dewes on the back *and* front legs!

Her foster owner says she is a pleasure to have; she is housebroken and has basic manners. We recently did xrays and were pleased to find she has good hips and elbows. She does have some arthritis in her spine, which she didn't receive treatment for in her previous home. We are trying some medications to see if this helps her have a little more giddyup in her step.

She gets along with other mellow dogs, but has little interest in young, bouncy, whippersnappers. We would prefer she go to a home with older children, as she doesn't seem to have been socialized to younger children.

Missy is being fostered in North Carolina.
