

# President's Letter – August 2021

My president's report is light this month. However, the Board handled several heavy issues this past month, and we had a short turn-around from our last BOD meeting in July. That said, I feel we are now better positioned to concentrate on upcoming events and health programs which is definitely the forward course we have been trying very hard to achieve. Our club has some very successful committees, we experienced a successful National, and now we will turn to the election process and the report of our Financial Review Committee. It has been all-hands-on-deck and there have been several hands offering to help, although we still have some committees who are shorthanded. We'd be grateful of any other club members who would like to help however they can. I hope summer finds all of us enjoying some deserved downtime and healthy loved ones.
